

Overture-5000 Series

Point of Sale Terminal

The Overture-5000 Series POS Terminal performs automatic parking fee calculations. The large touch screen and the simplicity of the Fee Engine process allows for minimal cashier training. POS Terminals are utilized in conjunction with the Overture-2000 Series Entry Terminal for a complete online parking revenue control system. Payment options include cash, credit card and/or linear barcode validation tickets.

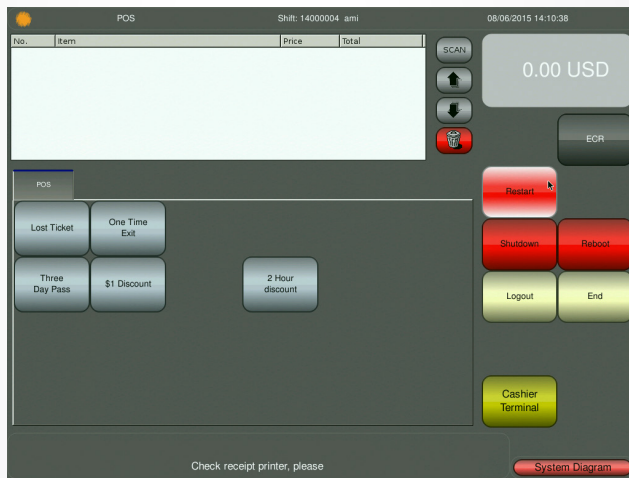

Features

- Can be configured for Central or Exit Pay (Exit Pay requires gate module)
- Maximum operator control
- Supports four tax rates
- Supports 26 rate structures (A-Z)
- Supports 9,999 store validations
- Maintenance-free thermal printer
- TCP/IP network connectivity
- 15" color touch screen POS Terminal
- Includes barcode ticket scanner
- One cash drawer included
- EMV capability optional
- Integrated fee display optional
