AMANO McGANN

Overture-9100
Series

eValidator

The Overture-9100 eValidator is an intelligent table-top merchant validator that prints a linear barcode of a store account on a parking patron's entry ticket.

Amano McGann's Overture-9100 eValidator allows you to attract more customers by offering time, fee and/or percentage discounts for parking at your facility and rate-switchover. The Overture-9100 is also compact, automatic and easy to use.

The store attendant or patron simply selects one of the four availabhle validation buttons and inserts the parking ticket into the unit. The Overture-9100 will then automatically transport the ticket into the device, print validation barcode and eject the ticket. The store number is encoded in the barcode to provide a predetermined discount at the parking facility and the validated ticket is automatically processed by the Overture-5000 Series Point-of-Sale Terminals, Overture-7000 Series Automatic Pay Stations and the Overture-4000 Series Exit Terminal.
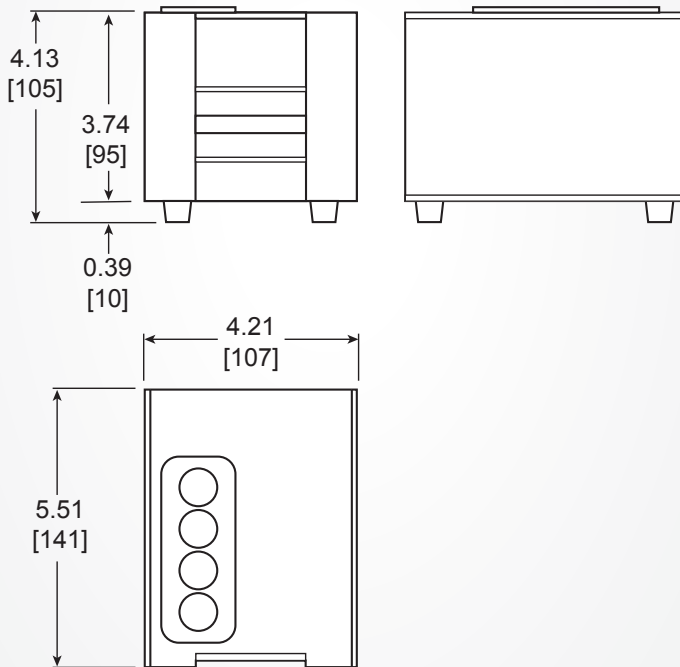

Features
- Auditable transactions
- Color-coded Condition LEDs for operation and service
- User friendly
- Lightweight, compact design
- Program up to four unique validations
