

Accurate, timely data is the key to making informed, strategic business decisions for your operation. Amano McGann's Pro+ Software solution provides a dynamic, real-time view of your assets and makes it easy to manage all revenue and access control functions in one fully-scalable, feature-rich program.

### Features

- Multi-Credential Access
- Multi-Tenant Management
- LPR Capable
- Digital Ticket Imaging
- Windows-based Environment
- Browser-based User Interface
- System Notifications

Count/Monitoring Statistics

Comprehensive Transactional Data

## Revenue Management

Real-time transaction display from entry and exit stations, POS fee computers, and pay stations to provide the ability to monitor system operation and alert management of system alarms.

- Configure and enable/disable devices
- Search, retrieve, and review:
  - Tickets
  - Transactions
  - Transaction Receipts
- Perform Rate Push
- Enable/Disable Digital Ticket Archiving
- Select rate for credit card in/out

## Access Control

Simplified programming, enhanced comprehensive parker database, and increased overall flexibility to make your system more powerful than ever before. With Pro+, management has one-click access to:

- Configure, enable/disable, and view status of readers
- Add/Edit/Delete cardholder accounts, credentials, access groups, and debit rates
- Perform searches and make global changes
- Configure and view activity, charges, and payment history
- Enter payments/charges/reversals
- Control gates and activate relays
- Send a rate to a device
- Configure alarms, anti-passback, and nesting

## Web Client Portal

- Browser-based access anytime, anywhere
- User name and password secured
- Programming, setup, monitoring, and reports
- Configure and monitor devices, alarms, and alerts
- 5 simultaneous user license standard (additional licenses available)

## Count and Monitoring

Control your space counts and lane devices effortlessly. Pro+ clearly displays space count and monitoring statistics such as:

- Differential Counts
- Non-Resettable Lane Activity Counts
- Lane Device Status
- Loop Activations
- Signage Conditions
- System Alerts
- Alarm Conditions
- Level Counts

## License Plate Recognition (LPR)

Paired with in-lane cameras, LPR facilitates revenue control and access-based functionality for your facility.

- Frictionless Entry and Exit
- Tighter Revenue Controls
- Recover Lost-Ticket Data

## Report Generator

Comprehensive reporting tools provide exceptional audit control and statistical reporting. Pro+ allows you to determine what information you need and when.

- Standardized Reports
- Export via Excel, PDF, Word, and Browser Windows
