

OPUS Series

Touchless Ticket Sensor

With just the wave of the hand, Amano McGann delivers a touch-free parking solution for issuing entry tickets.

Motion sensors available for the OPUS-2000/2700 Series Entry Terminals eliminate the need for physical contact when issuing a ticket. Patrons simply wave their hand in front of the motion sensor for a touch-free experience.

Amano McGann can deliver a completely contactless experience from touchless ticket issue to handsfree access solutions and contactless payment options.

Features:

- Infrared sensor with wave technology
- Adjustable sensor range from 2" to 8"
- Easily integrates into existing devices
- Works in all environmental conditions
- Sensor can be used alone or in conjunction with the ticket issue button
- Touchless technology facilitate enhanced customer safety
